WINDOWS BUILT ON PARTNERSHIP

PVC WINDOWS

We have been manufacturing high-quality PVC windows and doors for over 20 years. Our production is based on systems from leading suppliers Deceuninck®, Gealan® and VEKA®. We use fittings from the renowned German manufacturer Winkhaus®, ensuring excellent performance, functionality, and ease of use for both PVC windows and doors. Our wide, innovative product range, combined with an uncompromising approach to quality and affordable pricing, has made our PVC windows and doors popular not only on the local market, but also Scandinavia and Switzerland. We also have experience in the US market, that we try to expand.

FRONT DOORS

Our extensive range of doors makes our building joinery offer truly complete. We supply both aluminum and PVC doors manufactured in our own factory, as well as carefully selected products from trusted suppliers, allowing us to equip each project with high-quality entrance and interior doors tailored to its architectural style. All doors can be extensively customized to meet individual needs, with options such as electric strikes, fingerprint scanners, access control systems, cameras, smart locks, enhanced thermal and acoustic insulation, and a wide choice of colors, finishes, and glazing. This flexibility ensures maximum security, comfort, and a perfect match to both modern and classic buildings.

ALUMINUM CONSTRUCTIONS

Based on the globally respected Aluprof® systems, we produce a full range of advanced aluminum window and door solutions for residential and industrial projects. Our offer includes internal partitions, thermally insulated windows and doors, curtain wall systems, as well as modern sliding and folding terrace doors suitable for passive buildings. Combining excellent thermal performance with outstanding durability and design, our aluminum systems meet the highest standards of aesthetics and functionality. Our experienced Szach-Mat® technical team delivers tailored solutions to meet the specific needs of every project.

CERTIFICATIONS AND LEAD TIMES

Our windows and doors are designed to meet the expectations of the most demanding markets, including the United States. All products intended for the US market are tested and rated in accordance with NFRC standards, providing verified performance data for energy efficiency, thermal insulation, and overall comfort. This ensures full transparency and allows our clients to make informed decisions based on reliable, internationally recognized ratings. Thanks to efficient production processes and well-organized logistics, our current manufacturing lead time is approximately 4-6 weeks from order confirmation. Delivery times are optimized for the US market, with transport taking around 3-4 weeks to New York and approximately 5-6 weeks to California, ensuring predictable timelines and smooth project planning.
